JOURNAL OF IMMUNOLOGICAL METHODS

Contents to volume 179 (1995)

Number 1 – 13 February 1995

Research reports

Flow cytometry detection of surface antigens on fresh, unfixed red blood cells infected by *Plasmodium falciparum*
H. Jouin, Y.O. Goguet de la Salmonière, C. Behr, M. Huyin Qan Dat, J.C. Michel, J.L. Sarthou, L. Pereira da Silva and P. Dubois (France, French Guiana, Senegal) 1

In vitro production of monoclonal antibodies in high concentration in a new and easy to handle modular minifermenter
F.W. Falkenberg, H. Weichert, M. Krane, I. Bartels, M. Palme, H.-O. Nagels and H. Fiebig (Germany) 13

Conventional immunoassays underestimate anti-GST antibody titre
G.A. Cartwright, J.S. Rothel and M.W. Lightowlers (Australia) 31

Organ culture of human lymphoid tissue. I. Characteristics of the system
P. Hoffmann, G. Skibinski and K. James (UK) 37

An enzyme immunoassay for the determination of anti-IgA antibodies using polyclonal human IgA
S. Koskinen, M. Hirvonen and H. Tölö (Finland) 51

Recruitment of alloreactive natural killer cells to the rat peritoneum by a transfected cell line secreting rat recombinant interleukin-2
G. Løvik, J.T. Vaage, C. Naper, H.B. Benestad and B. Rolstad (Norway) 59

Establishment of a single-step hybridoma cloning protocol using an automated cell transfer system: comparison with limiting dilution
K. Wewetzer and B. Seilheimer (Switzerland) 71

IgA, IgG and IgM quantification in bronchoalveolar lavage fluids from allergic rhinitics, allergic asthmatics, and normal subjects by monoclonal antibody-based immunoenzymetric assays
R. Stokes Peebles, Jr., M.C. Liu, L.M. Lichtenstein and R.G. Hamilton (USA) 77

A method to trap IgG antibodies within functional membrane vesicles
S.C. Dreskin (USA) 87

Microculture tetrazolium assays: a comparison between two new tetrazolium salts, XTT and MTS
C.J. Goodwin, S.J. Holt, S. Downes and N.J. Marshall (UK) 95

Purification of bacterially expressed single chain Fv antibodies for clinical applications using metal chelate chromatography
J.L. Casey, P.A. Keep, K.A. Chester, L. Robson, R.E. Hawkins and R.H.J. Begent (UK) 105

Immunological standardization

The international standard for granulocyte colony stimulating factor (G-CSF). Evaluation in an international collaborative study
A.R. Mire-Sluis, R. Gaines Das, R. Thorpe and Participants of the Collaborative Study (UK) 117

The international standard for granulocyte-macrophage colony stimulating factor (GM-CSF). Evaluation in an international collaborative study
A.R. Mire-Sluis, R. Gaines Das, R. Thorpe and P.C. Study (UK) 127

Software notice

PEPMOTIF: a program for locating class I major histocompatibility complex restricted peptides in protein sequences
R.F. Jones and W.-Z. Wei (USA) 137

Notes to authors 139

Number 2 – 27 February 1995

Immunological standardization

The international standard for macrophage colony stimulating factor (M-CSF). Evaluation in an international collaborative study
A.R. Mire-Sluis, R. Gaines Das, R. Thorpe and Participants of the Collaborative Study (UK) 141

Research reports

Purification of immunoglobulin E (IgE) antibodies from sera with high IgE titers
J. Kleine-Tebbe, R.G. Hamilton, M. Roebber, L.M. Lichtenstein and S.M. MacDonald (USA) 153

Monoclonal antibodies against a minor and the major coat proteins of filamentous phage M13: their application in phage display
D. Bhardwaj, S.S. Singh, S. Abrol and V.K. Chaudhary (India) 165

Non-radioactive method to measure CD45 protein tyrosine phosphatase activity isolated directly from cells
D.H.W. Ng, K.W. Harder, I. Clark-Lewis, F. Jirik and P. Johnson (Canada) 177

The production of large 'signalling competent' myeloid cells from circulating $CD34^+$ cells in neonatal blood
G.M. Roberts, T. Hoy and M.B. Hallett (UK) 187

Autoantibodies directed against ribosomal P proteins: use of a multiple antigen peptide as the coating agent in ELISA
L. Caponi, S. Pegoraro, V. Di Bartolo, P. Rovero, R. Revoltella and S. Bombardieri (Italy) 193

Amino acid sequence based PCR primers for amplification of rearranged human heavy and light chain immunoglobulin variable region genes
M. Welschof, P. Terness, F. Kolbinger, M. Zewe, S. Dübel, H. Dörsam, C. Hain, M. Finger, M. Jung, G. Moldenhauer, N. Hayashi, M. Little and G. Opelz (Germany) 203

A new method for phenotyping proliferating cell nuclear antigen positive cells using flow cytometry: implications for analysis of the immune response in vivo
U. Kühn, U. Lempertz, J. Knop and D. Becker (Germany) 215

A rapid method for the isolation of analogues of human CD59 by preparative SDS-PAGE: application to pig CD59
C.W. Van den Berg, R.A. Harrison and B.P. Morgan (UK) 223

Fluorescence labelling with europium chelate of β-diketones and application in time-resolved fluoroimmunoassays (TR-FIA)
Y.-X. Ci, X.-D. Yang and W.-B. Chang (People's Republic of China) 233

Stabilization of erythrocytes by aldehydes and suitability of chicken IgY for the detection of potato virus X (PVX) in avidin-biotin enhanced reverse passive haemagglutination
A. Großmann, G. Eggers-Schumacher and E. Sander (Germany) 243

Transient transfection of murine B lymphocyte blasts as a method for examining gene regulation in primary B cells
S.B. McMahon, A. Norvell, K.J. Levine and J.G. Monroe (USA) 251

Short communications

Inverse PCR amplification of rare T cell receptor δ messages from mucosal biopsy specimens
Y. Chowers, W. Holtmeier, E. Morzycka-Wroblewska and M.F. Kagnoff (USA) 261

In vitro immunization: generation of neutralizing monoclonal antibodies to human interleukin-10
J. Guzman, K. Frei and D. Nadal (Switzerland) 265

Synthesis of a diepitope multiple antigen peptide containing sequences from two malaria antigens using Fmoc chemistry
N. Ahlborg (Sweden) 269

Letter to the editors

ELISA for titration of antibodies to tetanus toxoid in sera of immunized guinea pigs as an alternative to the toxin neutralization test in mice
R.K. Gupta (USA) 277

Contents to volume 179 (1995) 281

Notes to authors 283
